Comments	Questions	Response
	Will the removal and not replacement of the Stanislaus bridge affect any of the accepted projects?	As currently proposed, the Stanislaus bridge will be removed and an at-grade two-way street will be built in its place. The construction work could cause some detours in the proximate area but we anticipate the disruptions to the TCC projects to be minimal.
	How many affordable housing units for families are planned? 109 is not adequate when so much displacement of families has already occurred.	There is currently one affordable housing project included in the TCC package which includes 57 total units.
